## MAIN FEATURES

- Workflow variables management.
- Workflow configuration.
- Field-based workflows.
- Advanced properties edition.
- Integrated workflow management (add, edit or remove).
- Connect to other systems (SQL, web service).

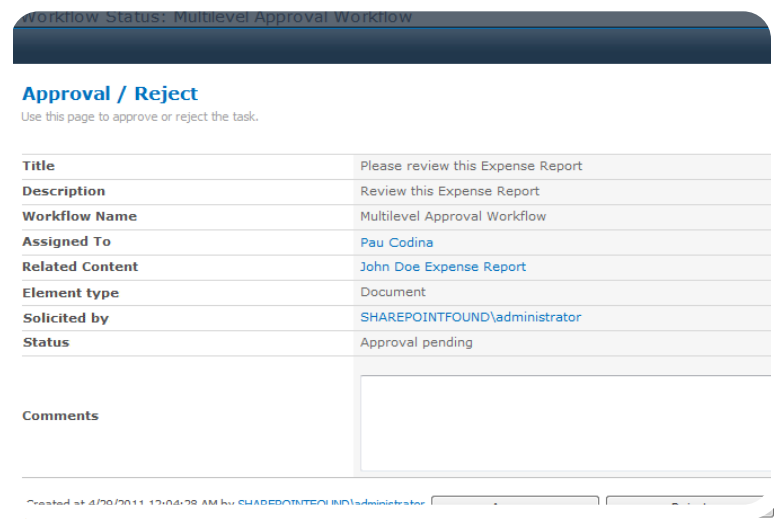

## EXTENDED ACTIVITIES EXPLORER

- Improved activities which allow to increase the flow modelling output.
- The "cross-site" activities provide an opportunity to work with lists from different SharePoint sites.
- It includes XML actions (queries, XPath and XSL).

## ADDITIONAL HIGHLIGHTS

- Task delegation with the ability to delegate a task to another person at any time.
- Enhanced task security.
- Workflow Import / Export (test env. VS production env.)
- Enhanced workflow designer with predictive "Drag & Drop" technology and view zoom options.
- Full SharePoint integration allows design workflows directly from SharePoint lists.
